The Five Love Languages

One of the most important characteristics of any healthy relationship, is the ability and willingness to express love. An obstacle that many couples face is that each partner might express and receive love in different ways. This lack of understanding can sometimes lead to conflict. Author Gary Chapman has identified five love languages that can lead couples to a better understanding of how they express and receive love. In this session, we will explore the Five Love Languages, identify important dynamics in the expression of these languages and help each person identify their own love language.

Presenter: Norm Rich

Norm has been a Theology & Psychology teacher for over 30 years and currently teaches at Alter High School. He received his BA in

Psychology from the Pontifical College Josephinum and his MA in the Science of Teaching from the University of Dayton. He and his wife Michelle have been married for 22 years and have two daughters, ages 17 and 19.
